It's a balancing act in today's private practices and clinics. Faced with continued rising costs, regulations, and management issues, practices look for assistance to help manage these challenges.

Private Practice Associates (PPA) understands what practices face. We work to bring you services, products and connectivity that otherwise might be out of reach or too costly.

PPA is the region's premier practice management and group purchasing organization. Our mission is to work with you to reduce costs and to help you succeed, so you can focus on what is important – patient care.

We coordinate a network of "Solution Partners" who carry or provide just about everything needed to successfully grow your practice. Participants are free to choose single services and products or take advantage of everything PPA offers.

Over the past five years, we have saved participants over \$1,000,000.
